

Bubble Recipe 2

Ingredients:

- 1 Litre of (hot) water,
- 250ml (1 cup) of GOOD quality washing up liquid (in the UK the Fairy Liquid brand really is best)
- 2-4 table spoons of glycerine (glycerine makes the bubbles thick and last longer – we added 4 spoons, though 2 should be enough) – You can find glycerine in the baking section of your supermarket. Glycerin is also great for adding to playdough, as well!

1) Mix all your bubble mixture ingredients together.

Tip 1: Try to avoid making bubbles as you do it – i.e. mix it as gently as possible.

2) Leave the bubble solution over night.

Tip 2: The longer you leave your bubble mixture the better, it gets better 2-3 days after being made!
