

Giant Bubble Recipe Number 1

(The one with the strange ingredients)

Ingredients:

- 6 cups water (distilled is best but tap water is fine, we used just boiled water)
- 1/2 cup (approx. 120ml) washing up liquid
- 1/2 cup (approx. 65g) cornflour
- 1 tbsp baking powder (not baking soda)
- 1 tbsp glycerine (you used to be able to get this in Aldi!)

How to Make Homemade Giant Bubbles Solution

1. Dissolve Cornflour

Dissolve cornflour in the water, stirring really well.

2. Add Remaining Ingredients

Stir in the rest of the ingredients, being very careful **not** to create a lot of froth.

3. Let it Sit

Allow your bubble mixture to sit for *at least* an hour before using, stirring occasionally when you see the cornflour settling to the bottom.

Note: Some of the cornflour won't dissolve completely and may even settle to the bottom when you're using your bubble mixture, but it won't affect the quality of your bubbles.

TIP: We find this bubble solution easiest to use if we pour it into a shallow baking pan or a large casserole dish. I like to use my largest (11x15) Pyrex dish. It allows us to get our wands completely submerged when loading them up with the bubble mix.
